Contents

01

Company Background

Established in 1999, initially operating in the fields of trading, steel fabrication, and mechanical, electrical, and instrumentation system integration, **PT. Mitra Prana Abadi Sentosa (MPAS)** is a company engaged in oil & gas energy services in Indonesia, particularly in oil & gas well production measurement (production well testing).

PT. MPAS is committed to providing the best solutions in production well testing, flow measurement, and operation and maintenance services for oil and gas facilities. MPAS has become a trusted partner to various national upstream oil and gas companies, with a proven track records of over 10,000 well tests conducted annually.

We focus on technology and innovations and workplace safety as the main pillars of every service we provide. Supported by an experienced team and an integrated work system, MPAS is capable of designing, operating, and developing Mobile Well Test units and multiphase flow metering systems for various field conditions, both onshore and offshore.

With a spirit of continuous growth and progress, we are constantly expanding our services and enhancing our technical competencies to meet the ever-evolving challenges of the oil and gas industry, and to support sustainable energy both in national and international scope.

MPAS

Accuflow MPFM Technology

MPAS, as the representative of Accuflow MPFM technology for more than 20 years in Indonesia, has demonstrated that Accuflow MPFM has been widely used to support oil and gas production measurement in both national and international oil companies, thanks to its ease of use, operational reliability, excellent accuracy, and fast measurement performance.

GLCC (Gas-Liquid Cylindrical Cyclone) Technology

MPAS has demonstrated that the Gas–Liquid Cylindrical Cyclone (GLCC) is an effective gas-liquid separation technology for both two-phase and three-phase flow, providing a reliable alternative to conventional separators. Its advantages include a more compact and lighter design, a smaller footprint, easier operation, and excellent separation efficiency.

Research and Development

MPAS consistently focuses on Research, Development, and Innovation to maintain its position as a leader in the well testing products and services.

Ongoing research and development is our core philosophy to ensure continuous technological advancement, delivering excellent products and services to our valued clients.
